Further advices from Texas amounted that the crop of being tapidly pleked, due to its being forces open by the recent how eather, so that the highest movement now in evidence is principally new cotton, which is far to excess to recents this time last year. The question to he solved is does the spinner intend to persist in his policy of abstection in the face at the liberal receipts now coming to band, which means an accumulation of stocks on this side, and which offers food for reflection. With bouning trade and rising values in cotton goods the situation for the moment is a problem difficult of solution.

York, August 24.-There was a decided let up in the attention paid to cotton futures by the general public and the volume of husiness was smaller probably than for any one day since the excitement in cotton first set in. There was no reason for the change as the average of crop news was quite as buil-ish as heretofore, and there was nothing special in the English advices to justify any

Nevertheless, the market declined rapidly after the momentum of vesterday's rise had expended itself is an advance of 325 points, contined to the opening call. Trading was for a line very active, but liquidation soon commenced and a few of the larger local bear operators accelerated the downward movement by pounding the market. The government report indicate some possibility of rains in the northerly section of the cotion belt with no relief for the central and more Southern connection. The market broke from the opening prices about 12345 points. During the afternoon a very nervous feeling obtained and while the extent of the variations became smaller the course of the market was such as to indicate unsettled views. The market was finally steady at a net loss of 557 points.
